

MAY WINNER

70 Red Buckets of Surprises!

“ I had received a lead from Jason (Hopping) to install about 1,200 Square Feet of Semstone 145 ARFC and Semstone 245 ARFC for a pilot plant. This particular facility will be a pilot operation which will lead to a much larger scale project including Carboline coatings. I reacted quickly to the opportunity and met with the Facility Engineer within the next few days. The turnaround was very fast paced and I had commitment from the facility before I left my first site visit. Over the next few days I priced the project and received a purchase order. It is always a great experience when a sales rep can source leads that are taylor made for the contractor. Jason even came out during a portion of the install. I have attached a photo to prove it! ”
